PortfolioForMe Item List

The following is a list of items needed to build your own personal portfolio website. The URL for your website will be username.github.io/project. If you want a custom domain name, you will have to purchase one separately and provide us with the domain name. We recommend NameCheap.com as they offer affordable domains and provide free WHOIS privacy. A feature that is extra on other domain sites like GoDaddy.

Item #	Item Name	Item Description
Item #1	Picture	Portrait photo of yourself.
Item #2	Skills	Job titles and/or Skills you want to highlight. Please provide between 3 and 5.
Item #3	Bio	Let the reader learn more about you with a CV, professional bio or just a blurb about yourself.
Item #4	Resume	I will need a copy of your resume in document form. It cannot be a PDF.
Item #5	Email	Email address for contact form.
Item #6	Location	Your location. Most people just do City and State.
Item #7	Thank You Massage	A thank you message for visitors to your site.
Item #8	Social Media	Links to any social media you want on your website.
Item #9	Color Scheme	Primary, secondary, and tertiary color scheme.
Item #10	GitHub Login	We use GitHub to host your site. We will need you to create an account or give us permission to create one for you.
Item #11	URL	GitHub provides a free URL in the form of your username .github.io/ the projectname. If you want a custom domain name, you will have to purchase one and provide it to us. As stated above, we recommend www.NameCheap.com.
Item #12	Access	We will need access to your GitHub account, and if you purchased a domain, the site that you purchased it from, in order to set everything up.
